Draw Groom Guides V 1.0

Tool Installation Instructions :-

---

- Copy the provided drawGroomGuides.pyc file into your Maya's default script folder, it'll be similar to -
C:\Users\USR\Documents\maya\20XX\scripts folder.

- Here USR will be your user name and 20XX will be your installed Maya version.

- After that launch your Maya & open the Python Script editor, in that copy- paste the following code and execute it to open the Tool UI -

import drawGroomGuides
from drawGroomGuides import drawGroomGuidesUI
from drawGroomGuides import pTCr
from drawGroomGuides import klPJb
from drawGroomGuides import lJb
drawGroomGuidesUI()

- Once the Tool UI is launched, you will have to Activate the Tool License for that specific PC.

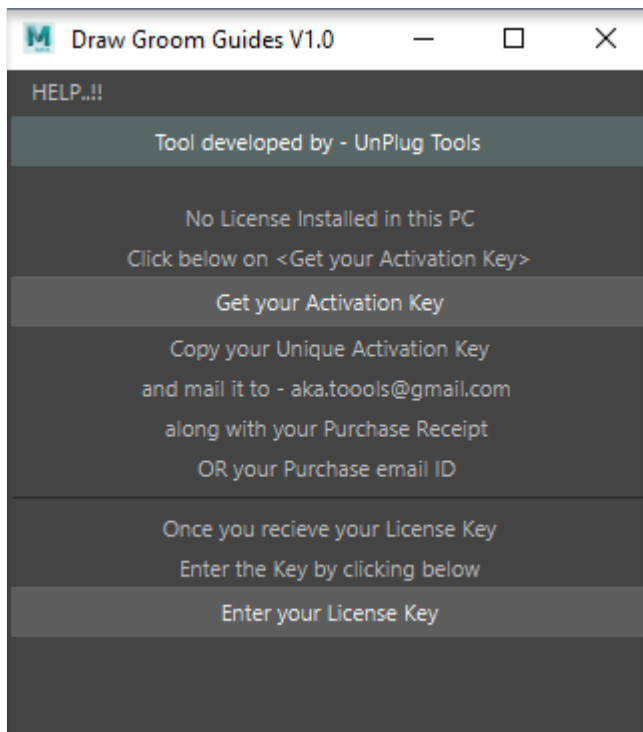

- Next, click on 'Get your Activation Key' button to generate your Unique 'Activation Code'.
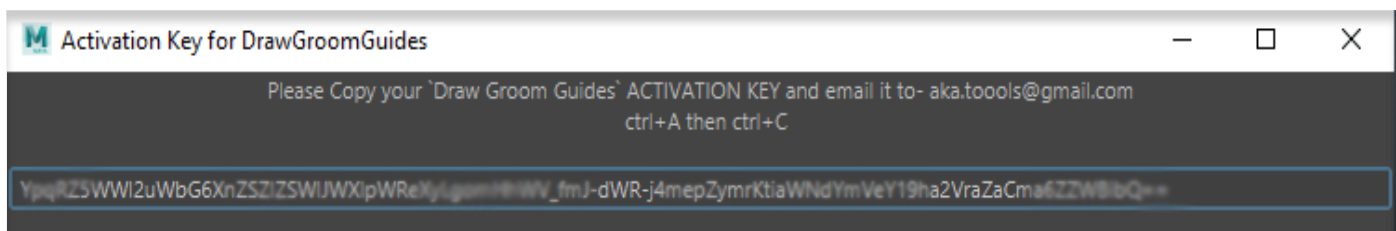

- Next, copy your Unique 'Activation Code' from the Popup window & email the code to *aka.toools@gmail.com* along with your full purchase details, like Gumroad receipt & email ID.

- It would take Max upto 24 Hrs (working weekdays) you to receive your 'License Key Code', so kindly be patient 😊

- Once you receive your Unique 'License Key Code', you would need copy it, then click on 'Enter your License Key' button in the Tool UI, then to paste it into the Popup window, and click OK.

- After that run the UI-Code   drawGroomGuidesUI()   once again to launch the Licensed Tool UI. Happy Grooming.
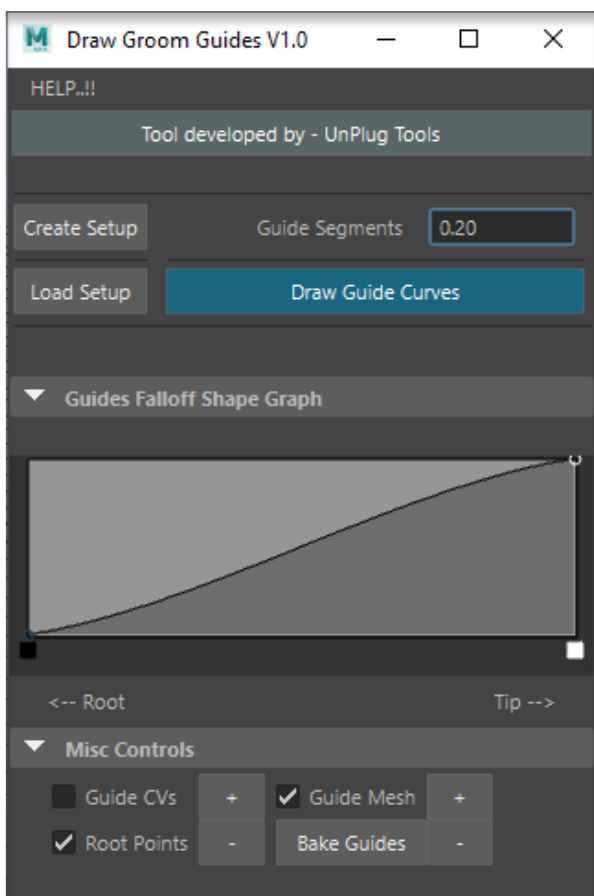

In case of any further technical issues, kindly contact *aka.toools@gmail.com* with full details of the issue.

Thanks
