Comb My Guides V 1.0

Tool Installation Instructions : -

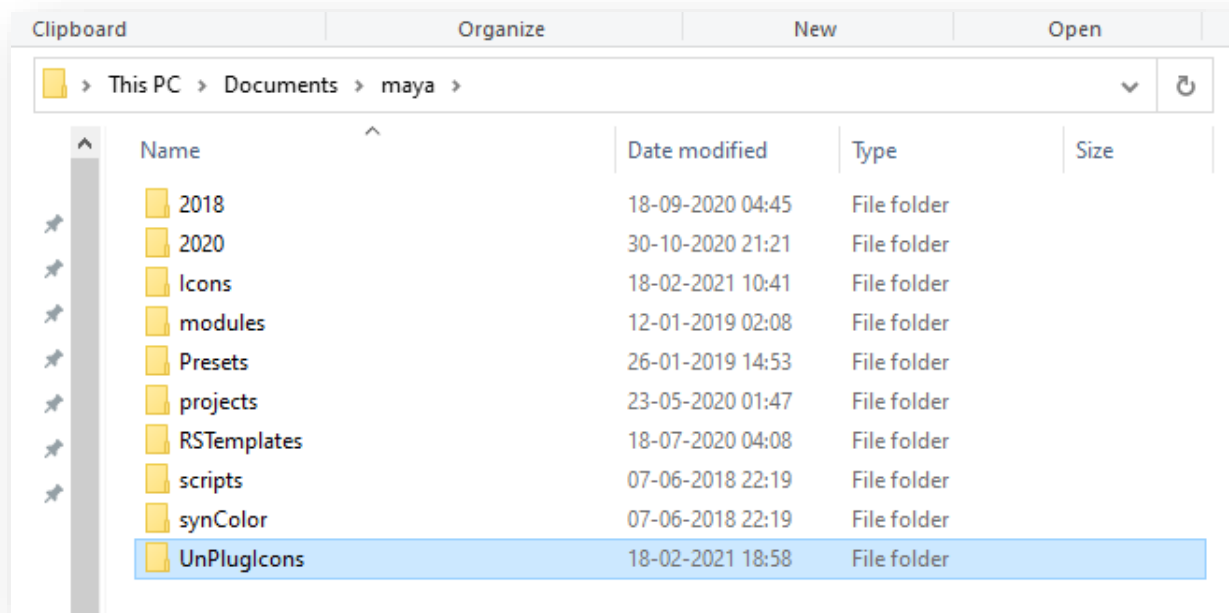

- Copy the provided combMyGuides.pyc file into your Maya version's default script folder,
  it'll be similar to -   C:\Users\USR\Documents\maya\20XX\scripts   folder.

- Here USR will be your user name and 20XX will be your installed Maya version.
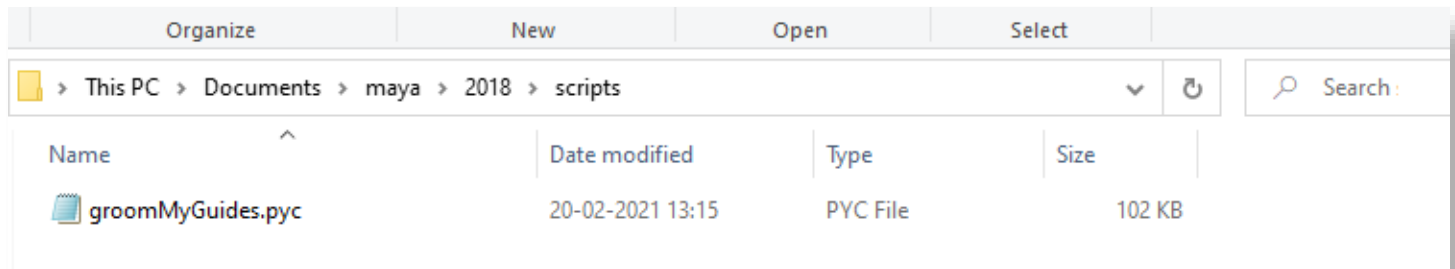

- Copy the provided UnPlugIcons folder into your Maya's default root folder.
  it'll be similar to –   C:\Users\USR\Documents\maya\   folder. Here USR will be your user name

- After that launch your Maya & open the Python Script editor, in that copy- paste the following code and execute it to open the Tool UI -

```
import combMyGuides
from combMyGuides import combMyGuidesUI
combMyGuidesUI()
```

- Once the Tool UI is launched, you will have to Activate the Tool License for that specific PC.

- Next, click on 'Get your Activation Key' button to generate your Unique 'Activation Code'.
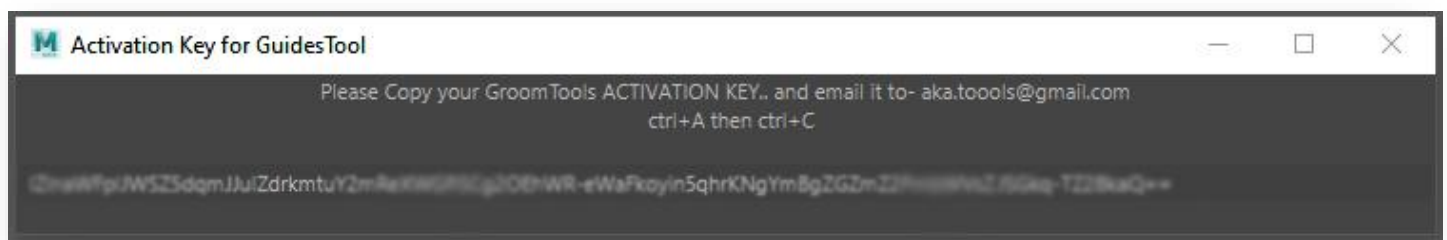

- Next, copy your Unique 'Activation Code' from the Popup window & email the code to *aka.toools@gmail.com* along with your full purchase details, like Gumroad receipt & email ID.

- It would take Max upto 24 Hrs (working weekdays) you to receive your 'License Key Code', so kindly be patient 😊

- Once you receive your Unique 'License Key Code', you would need copy it, then click on 'Enter your License Key' button in the Tool UI, then to paste it into the Popup window, and click OK.
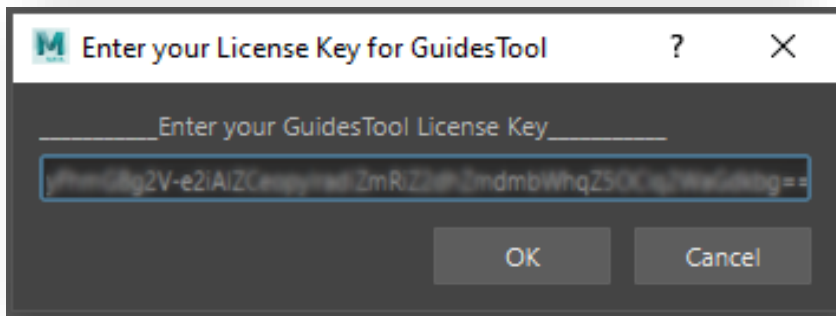

- After that run the UI-Code   combMyGuidesUI()   once again to launch the Licensed Tool UI. Happy Grooming.
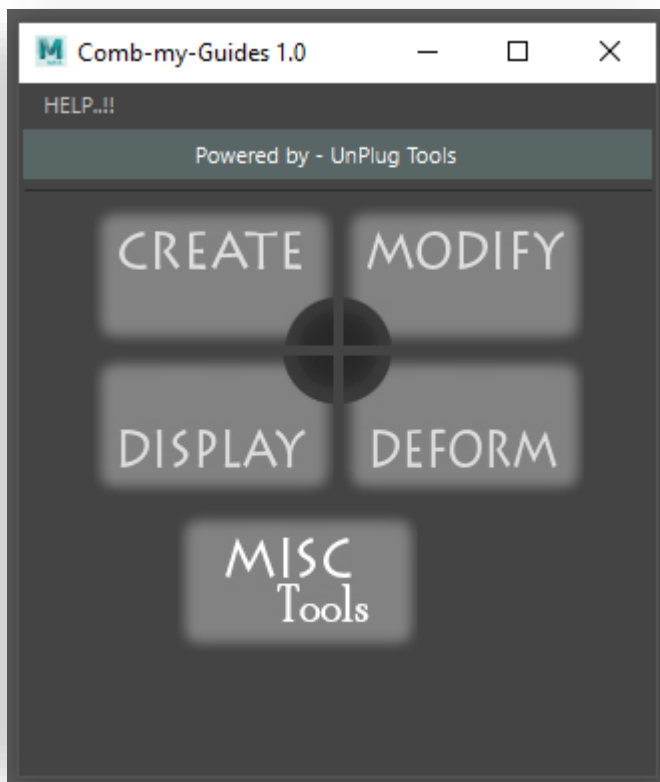

In case of any further technical issues, kindly contact *aka.toools@gmail.com* with full details of the issue.

Thanks
